#### WINEMAKING & TECHNICAL DATA

**FERMENTATION:** Crushing and destemming at temperatures between  $75^{\circ}F-82^{\circ}F$ . San Michele undergoes the 'Ripasso' process: the first fermentation yields a young, fruity wine, typical of Valpolicella. The second fermentation is carried out on the pressed skins and pomace from Castellani's best amarones. This process increases color, body and complexity of the aromas.

**BARRELS:** Slavonian oak barrels and French wooden casks.

**AGING:** Aged for at least 2 years, with 18 months in mid-size Slavonian oak barrels and French wooden casks and the remainder in bottle before release.

**PH:** 3.45 **TA:** 5.57 g/l

**BOTTLING DATE:** 08/31/2023
